

WHO IT'S FOR

Built for organisations with a duty to listen

- **Banks and microfinance banks**
Fraud, conduct and governance concerns
- **Insurers and pension schemes**
Claims fraud and misconduct reporting
- **SACCOs and fintechs**
A trusted channel for staff and members
- **Listed companies and state corporations**
Board and audit committee oversight
- **Groups and multinationals**
One platform, a separate channel per entity

Designed around ISO 37002 and the EU Whistleblowing Directive, so your channel stands up to regulators and auditors.

Smartcode Technologies

Software for banking, payments and business

Every concern heard. Every angle covered.

A secure, anonymous reporting channel and case management platform, branded for your organisation.

Anonymous

Encrypted

Audit-ready

A product of **Smartcode Technologies**

HOW IT WORKS

Misconduct stays hidden when people don't trust the channel

Whistle360 gives your people a safe way to speak up, and your team a clear way to act, in three steps.

01 Report

Staff, customers or suppliers report by web, mobile, USSD or SMS, anonymously if they choose.

02 Investigate

Your case team triages, assigns and asks follow-up questions, while the reporter stays anonymous.

03 Resolve

Act on findings, give the reporter feedback on time, and keep a full audit trail for the board.

ANONYMOUS BY DESIGN

Reporters stay unknown. Evidence stays sealed.

No tracking

No IP addresses, device details or tracking cookies are stored.

Private case key

Reporters follow up with a key and password, never an email or phone number.

Sealed per organisation

Each organisation's reports are encrypted with its own keys and kept apart.

✓ Report received

Your case key is **7KQ4-M2XP-9WDR**. Use it to check for replies from the case team.

FEATURES

One platform for every entity you run

- ✓ **Branded portal** on your own domain and languages
- ✓ **Case management** with deadlines and SLA alerts
- ✓ **Anonymous two-way messaging** with reporters
- ✓ **Conflict-of-interest routing** when a manager is named
- ✓ **Board and regulator reports** in a few clicks
- ✓ **Group oversight** across subsidiaries and countries
- ✓ **SSO, 2FA and a full audit trail**, with in-country hosting

Give your people a safe way to speak up
